

Errata: April 10, 2019

Thank you for purchasing [Entity Framework Core in Action](#). Please report errors not shown below in the book's [LiveBook Errata thread](#). We'll update this list as necessary. Thank you!

## Section 1.2, page 6

The link with text "<https://github.com/JonPSmith/GenericServices>" in the PDF has an underlying link of <http://www.mng.bz/2x0T>. That should be replaced with <https://github.com/JonPSmith/GenericServices>.

## Section 3.2.2, page 61.

The sentence "If the linked instances are new (not already known to EF Core), EF Core will track them and set their State to **New**." This should read "If the linked instances are new (not already known to EF Core), EF Core will track them and set their State to **Added**."

## Section 5.4.2, page 122, Listing 5.2.

```
//... other service defintions removed
```

The word definitions is misspelled.

```
//... other service definitions removed
```

## Section 6.8, pages 159 and 160.

There is one occurrence on page 159 and two occurrences on page 160 where `[Column(DataType =` should read `[Column(TypeName =`.

## Section 7.4.3, page 179.

The line `Property(nameof(DefaultEntity.Name))` in listing 8.8

should be

```
Property(nameof(DefaultTest.Name)).
```

## Section 8.4.3, page 218, Listing 8.8.

```
Property(nameof(DefaultEntity.Name)).CurrentValue;
```

should be

```
Property(nameof(DefaultTest.Name)).CurrentValue;
```

## Section 9.3.2, page 243, Figure 9.4.

The last line of code in the blue box should be `"context.Remove(myEntity);"` not `"context.Update(myEntity);"`.

NOTE: The livebook is correct as it uses my original diagram.
